

Project Initialization and Planning Phase

Date	06 July 2026
Team ID	XXXXX
Project Name	AI-Driven Emotion Detection & Personalized Learning Support Platform
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement	I am (Customer)	Im trying to	But	Because	Which makes me feel
PS-1	An undergraduate student struggling with a difficult concept	Understand the topic and finish my assignment on time	I cant always tell if Im confused, frustrated, or just not trying hard enough	theres no one available at 1am to explain it patiently and without judgment	anxious, isolated, and unsure whether to keep going or give up
PS-2	A teaching assistant supporting 100+ students across office hours and email	Identify which students are genuinely stuck versus just venting, and respond appropriately	I only see raw text messages with no emotional context to prioritize by	theres no one available at 1am to explain it patiently and without judgment	overwhelmed, and worried that a student who truly needs help falls through the cracks
PS-3	A teaching assistant supporting 100+ students across office hours and email	Get quick, encouraging guidance the moment I hit a wall	generic FAQ pages dont respond to how Im actually feeling about the problem	most learning platforms only track right/wrong answers, not emotional state	discouraged, and more likely to abandon the course altogether
