

Brainstorming & Idea Prioritization

Date	: 05 July 2026
Team ID	XXXXXX
Project Name	AI-Driven Emotion Detection & Personalized Learning Support Platform
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

All ideas were listed individually by Kondru Dhyanesh without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Kondru Dhyanesh	Text-based Emotion Detection using BiLSTM to identify emotions such as Confused, Frustrated, Curious, Confident and Stressed.	Emotion Detection	G1
2	Kondru Dhyanesh	Personalized AI Learning Support using Gemini that first provides reassurance to students and answers only if the teacher does not respond.	Learning Support	G2
3	Kondru Dhyanesh	Analytics Dashboard to visualize emotion distribution, learning pain points, frequently asked doubts and most confusing topics.	Analytics	G1
4	Kondru Dhyanesh	Student Learning History to track emotion timeline, progress and recurring learning challenges for personalized support.	Learning Analytics	G2
5	Kondru Dhyanesh	RAG-based Knowledge Retrieval using class notes, previous discussions and study materials to generate contextual responses.	AI Enhancement	G1
6	Kondru Dhyanesh	Smart Doubt Clustering to group similar student questions and notify teachers about common learning difficulties.	Learning Analytics	G2

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Text-based Emotion Detection using BiLSTM	High	High	High	Yes
2	Personalized Learning Support with Gemini and RAG	High	High	High	Yes

Note: All brainstorming and idea prioritization was carried out individually by Kondru Dhyanesh, as other team members did not participate in the project.
